 - a. Interest rate risk indicators
 - b. Refinancing risk
 - c. Foreign exchange rate risk
 - d. Debt service ratios
4. Upcoming Activities for Q3, 2026

1. Quarter 2, 2026: Progress in Debt Management Activities

During the second quarter of 2026 (April–June), the Government of Somalia continued to advance its debt relief negotiation strategy through active engagement with the remaining bilateral and multilateral creditors. These efforts were focused on securing debt relief from the outstanding creditors in accordance with the **Paris Club Agreed Minutes of 13 March 2024** and the framework of the **Enhanced Heavily Indebted Poor Countries (HIPC) Initiative**. The Government remains committed to finalizing the remaining debt restructuring agreements to achieve a comprehensive resolution of Somalia's external debt obligations.

Status of ongoing Negotiations:

Since the previous quarter, the Debt Management Department (DMD) has continued to make progress in negotiations to resolve outstanding arrears with the remaining non-Paris Club bilateral creditors, the sole remaining multilateral creditor, and Spain regarding its outstanding debt. These efforts are being undertaken in accordance with the Paris Club Agreed Minutes of March 13, 2024 and within the framework of the Enhanced Heavily Indebted Poor Countries Initiative, with the objective of securing comprehensive debt relief and normalizing creditor relations.

Ongoing engagements and discussions with creditors have resulted in significant progress toward debt resolution, including continued advancement of debt cancellation arrangements and structured debt-for-development swap discussions with Spain. In parallel, progress has also been made with other creditors, including agreements in principle with Algeria and Romania, while negotiations with Iraq, Bulgaria, Serbia and Libya remain ongoing.

2. Somalia's Debt Stock and Flow Data – Quarter 2, 2026

Debt Stock as at End-June2026

Somalia's current public debt portfolio consists entirely of external debt, primarily owed to multilateral and bilateral creditors, with the exception of one commercial loan from a lender in Serbia. Bilateral creditors continue to represent the largest share of the debt portfolio.

At the end of the second quarter of 2026, the total outstanding public debt stood at USD 1.48 billion. Of this amount, debt owed to multilateral creditors accounted for 43 percent, equivalent to USD 631.05 million. The largest multilateral creditors were the Arab Fund for Economic and Social Development, the Arab Monetary Fund, and the International Monetary Fund.

Debt owed to bilateral creditors amounted to USD 800.44 million, representing 57 percent of the total debt portfolio. Of this amount, non-Paris Club creditors accounted for nearly 95 percent of bilateral debt. The largest creditors within this category include the Abu Dhabi Fund for Development, the Government of Iraq, the Kuwait Fund for Arab Economic Development, and the Saudi Fund for Development. The only remaining Paris Club creditor is Spain, with negotiations currently advancing and an agreement expected to be concluded in the near future. In addition, the outstanding commercial loan owed to a Serbian company stood at USD 2.77 million.

Despite the significant progress made in debt restructuring, Somalia's debt portfolio continues to be characterized by a substantial level of arrears. Outstanding arrears remain concentrated among non-Paris Club creditors and one multilateral creditor, accounting for approximately 34 percent of the country's total outstanding debt. The Government remains committed to engaging these creditors to secure comparable debt relief treatment in line with the Paris Club framework and the Common Reduction Factor set out in the HIPC Decision Point Document.

In addition, there remains one claim classified as commercial debt that was originally contracted with a State-Owned Enterprise in the former Yugoslavia. The National Bank of Serbia has since informed the Debt Management Department of the Ministry of Finance that this claim is now held by a private commercial entity. It should be noted that the data presented in this bulletin relates to external debt obligations of the Federal Government of Somalia. At present, the Government has not issued domestic securities, undertaken domestic borrowing, or extended any sovereign guarantees.

A detailed breakdown of the debt stock as at the end of Quarter 2, 2026 is presented in Table 1, while Table 2 provides an overview of the outstanding arrears stock as of the same period.

Footnote:

1/ The calculation of penalty interest arrears remains subject to reconciliation with the Iraqi authorities, as their methodology for calculating the applicable interest rate differs from ours. We

have made several attempts to reconcile the outstanding balances; however, the Iraqi authorities have not yet provided sufficient supporting information or detailed calculations to enable us to verify and reconcile their figures with our records. Consequently, the debt stock presented above should be regarded as provisional and may be subject to revision once both parties complete the reconciliation process. The final debt figures will be confirmed upon the successful conclusion of the ongoing negotiations and the achievement of a mutually agreed settlement.

2/ Similar to the situation with Iraq, the calculation of penalty interest arrears with the Libyan debt remains subject to reconciliation. We have made several attempts to reconcile the outstanding balances; however, the Libyan authorities have not yet provided sufficient supporting information or detailed calculations to enable us to verify and reconcile their figures with our records. Furthermore, their methodology for calculating penalty interest differs from the methodology applied in our debt database. Consequently, the debt stock presented above should be regarded as provisional and may be subject to revision once both parties complete the reconciliation process. The final debt figures will be confirmed upon the successful conclusion of the ongoing negotiations and the achievement of a mutually agreed settlement.

Timely debt servicing and arrears prevention during Q2, 2026:

The Ministry ensured that all scheduled debt service payments falling due during the second quarter of 2026 were settled in a timely manner, with no arrears incurred during the period. This reflects the Government's continued commitment in honouring its debt service obligations as they fall due and maintaining sound debt management practices.

Footnote:

1/ The debt service payment to the Saudi Fund is contractually due on 15 January 2027. However, since the Government's annual budget does not become operational until the fourth week of January, the necessary budgetary allocations would not be available by the payment due date. To avoid any delay in meeting this obligation, the payment should be made in December 2026, when the FY2026 budget remains available for execution.

3. Risks of the Debt Portfolio

a. Interest rate risk indicators

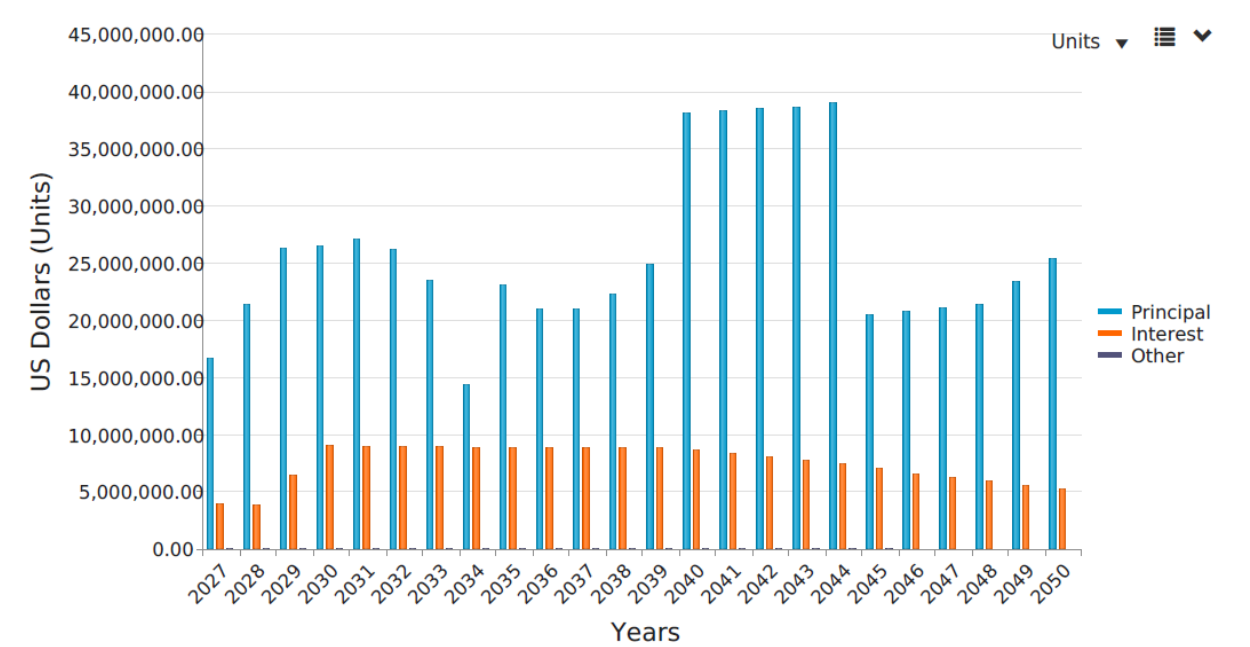

Most of Somalia's outstanding current debt portfolio has been contracted with fixed interest rate and denominated in foreign currency. However, when taking into account the existing stock of arrears, there are few loans that were originally contracted with variable interest rates. Debt with variable interest rate is limited to some loans from Iraq and Libya.

b. Refinancing risk

The total amortization payments scheduled within one year is limited to multilateral and official creditors. The following profile illustrates a concentration of payments occurring between 2027 and 2050, due to the scheduled repayment of restructured debt agreements with creditors. It is important to highlight that the repayment profile has increased from 2027 to 2033 due to the

inclusion of debt service obligations to Spain, for which negotiations are still in progress as efforts persist to finalize the bilateral agreement in accordance with the Paris Club Agreed Minutes of March 2024, alongside a Poverty Reduction and Growth Trust (PRGT) loan from the International Monetary Fund (IMF) that was made available to the government for budgetary support. Furthermore, the increase in high debt servicing for the periods from 2035 to 2044 is associated with the AMF normalization of payments. With an average maturity period of 19.0 years, Somalia's debt portfolio exhibits a low refinancing risk.

Fig. 2: Somalia repayment profile. 2027 – 2050. Million USD

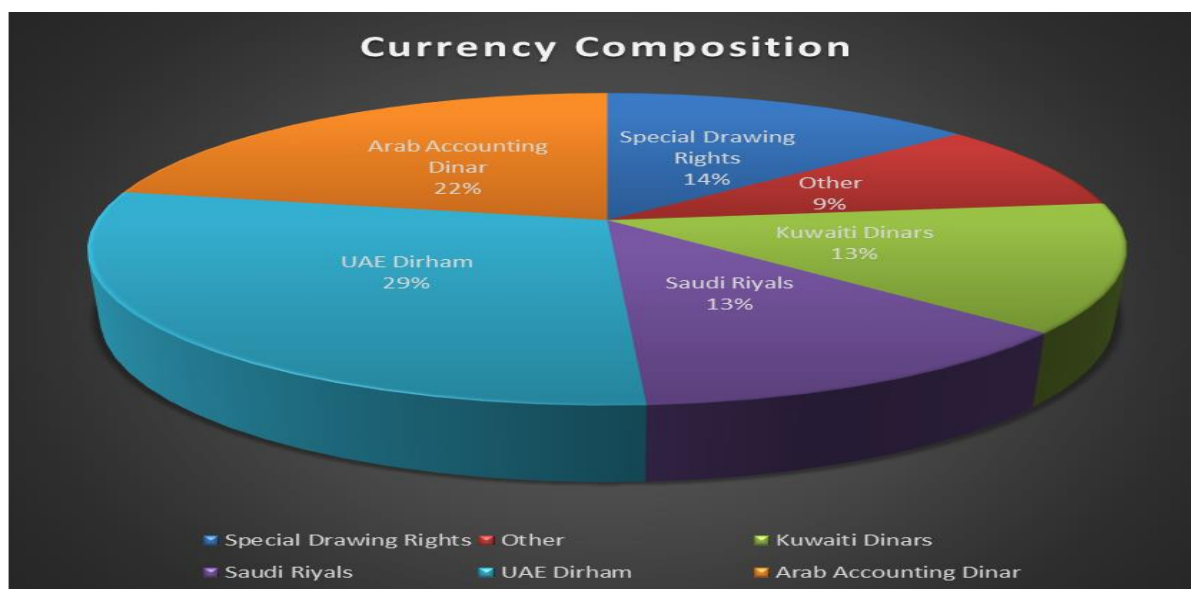

Source: DMD, Ministry of Finance, FGS.

c. Foreign exchange rate risk

As mentioned in the previous section, all of Somalia’s debts are denominated in foreign currency. The breakdown of debt by currency shows that 29 percent is in Arab Emirates Dirham (AED), followed by 22 percent in Accounting Dinar (AAD), 14 percent in Special Drawing Rights (SDRs), 13 percent in Saudi Riyals, and Kuwaiti Dinars, and 9 percent other currencies.

Figure 3: Somalia, total debt stock at the end of Q2, 2026 by currency.

Source: DMD, Ministry of Finance, FGS.

d. Summary of Somalia's cost and risk indicators at end of 2025¹

Table 5 below provides an overview of existing cost and risk indicators for Somalia's debt portfolio as of end of 2025. The indicators show a relatively long ATM (and ATR as all the current debt is in fixed interest rates) of over 19 years with a small percentage falling due in the next year (1.6 percent of total debt).

Table 5: Summary of cost and risk indicators at the end of 2025

Risk Indicators		Total debt
Refinancing risk	ATM (years)	19.0
	Debt maturing in 1yr (% of total)	1.6%
Interest rate risk	ATR (years)	19.0
	Debt refixing in 1yr (% of total)	1.6%
	Fixed rate debt (% of total)	100.0%
FX risk	FX debt (% of total debt)	100.0%

e. Debt ratios

Projected debt service ratios in terms of revenues (including grants) and exports of goods and services show similar ranges. Table 6 below shows the projected debt service ratios.

¹ Includes all restructured debts. Excludes existing debt in arrears.

4. Upcoming Activities for Q3, 2026

Over the next three months, the Government will continue to engage with the remaining creditors with the aim of finalizing the outstanding debt restructuring agreements.

The Government remains fully committed to pursuing a comprehensive and coordinated engagement strategy with non-Paris Club bilateral creditors, multilateral creditors, and commercial creditors in order to secure debt relief under the Enhanced Heavily Indebted Poor Countries Initiative and to obtain treatment comparable to that provided by Paris Club members.

To support this objective, the Debt Management Department (DMD) has scheduled further negotiations with the remaining creditors, with the goal of reaching timely and mutually agreeable settlements on outstanding arrears.
